Indices Product Specification Sheet

Indices have the advantage of allowing traders to take a wider view of a basket of stocks rather than a view of one individual stock alone. A stock index is a good indicative measure of market performance. Indices such as the FTSE 100 and DJIA index are baskets of blue chip stocks listed on the exchange and are generally a good measure of the current market sentiment. A change in the performance of any constituent stock in an index is reflected in a change in the overall value of that index.

Symbol	Minimum spread (Index Point)	Average spread (Index Point)	Margin	Hedge margin	Overnight financing cost	Min (MT5)	Max (MT5)	Tick	Currency
AUS200	0.00	1.17	0.2%	0%	variable	0.1	250	0.01 Index Point	AUD

Finance Adjustments

All finance adjustments for open positions in cash indices are carried out at or after 17:00 ET. Finance adjustments are not made on open positions on CFD futures markets. As you hold a position overnight, (i.e. After 17:00 ET) a finance adjustment is made to your account. This is calculated as follows:

f = (s x p x r) / d

Where

f = daily financing charge

S = your stake

P = closing price as determined by IC

r = swap rates in platform's product specification

d = number of days, i.e. 360 days

Leverage

Leverage is determined by both position size and the time of day. Please refer to the table below for the applicable leverage levels. You can also view the current leverage requirements directly on your trading platform.

	Leverate based on position size		**Higher Margin Requirement**		
	1:500	**1:200**	**EOD**	**Weekend**	**News Events**
US30	≤100 lots	>100 lots	1:200	1:100	1:200
US500	≤700 lots	>700 lots	1:200	1:100	1:200
USTEC	≤200 lots	>200 lots	1:200	1:100	1:200
US2000	≤1,500 lots	>1,500 lots	1:200	1:100	1:200
